SUBUNIT: Interacts with FBLN1 (By similarity).
SUBCELLULAR LOCATION: BASEMENT MEMBRANES.
PTM: N- AND O-GLYCOSYLATED.
SIMILARITY: Contains 6 EGF-like domains.
SIMILARITY: Contains 1 thyroglobulin type-I domain SIMILARITY: Contains 5 LDL-receptor YMTD domains.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             e to chromosome 1443.";

notch protein - fruit fly (Drosophila melanogaster)
N;Alternate names: neurogenic repetitive locus protein
C;Species: Drosophila melanogaster
C;Date: 10-Sep-1999 #sequence_revision 10-Sep-1999 #text_change 10-Sep-1999
C;Accession: A24420; A24768; S09358; A05267

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

RESULT 1
PCT-US99-08900-2
; Sequence 2, Application PC/TUS9908900
; GENERAL INFORMATION:
APPLICANT: Millennium Biotherapeutics, Inc.
TITLE OF INVENTION: NOVEL MOLECULES OF THE T125-RELATED PROTEIN FAMILY
TITLE OF INVENTION: AND USES THEREOF
FILE REFERENCE: 09404/074W01
; CURRENT APPLICATION NUMBER: PCT/US99/08900
; CURRENT FILING DATE: 1999-04-23
; EARLIER APPLICATION NUMBER: US 09/065,363
; EARLIER FILING DATE: 1998-04-24
; NUMBER OF SEQ ID NOS: 23
; SOFTWARE: FastSEQ for Windows Version 3.0
; SEQ ID NO 2
; LENGTH: 273
; TYPE: PRT
GORGANISM: Homo sapiens
